EDUCATION

Government Engineering College, Baran

B.Tech in Computer Science Engineering (RTU Kota); CGPA: 6.68 | Sep 2023 – Dec 2027

Baran, Rajasthan

EXPERIENCE

Fotographiya

Aug 2025 – Aug 2026

MERN Stack Developer (Full-Time) — Kota, Rajasthan (Hybrid)

- Served as primary developer for re-architecting the AI face recognition pipeline, shifting face processing from request-time scanning to upload-time indexing for major gains in speed and scalability.
- Achieved high-accuracy face matching (~98%) using deep learning-based facial embedding's and vector similarity search.
- Independently designed and built a separate company website (Home, About, Contact, Portfolio, Services) with full SEO, AEO, and GEO optimization.
- Strengthened application security through protected routes and improved input validation for selfie capture.

Fotographiya

16 June 2025 – 31 July 2025

MERN Stack Developer Intern — 45-Day Internship (Grade A), On-site

- Built a full-stack event-photo-sharing platform end-to-end, handling frontend (React), backend (Express, Node.js), and database (MongoDB Atlas) independently.
- Designed database schemas for folders, media, and users/admins to support scalable event-based photo organization.
- Implemented secure authentication using JWT and email OTP verification for user onboarding.
- Built the initial version of a face recognition feature enabling users to automatically retrieve their own photos from large event collections (weddings, concerts) via selfie-based matching.

OctaNet Services Pvt Ltd (Remote)

Oct 2024 – Nov 2024

Python Development Training Program

- Completed a 2-month remote training program focused on core Python development.

PROJECTS

Fotographiya Company Website

- Independently designed and built a frontend-only marketing website (Home, About, Contact, Portfolio, Services) for the company, with full SEO, AEO, and GEO optimization to improve discoverability.

Fotographiya — Quick Photo Sharing App

- Built a full-stack event-photo-sharing platform (React, Express.js, Node.js, MongoDB Atlas) with JWT + email OTP authentication and folder/media/user schemas for scalable event-based organization.
- Added a face recognition feature so users only see photos containing their own face: admin-uploaded group photos are processed once into stored face embeddings, matched against each user's selfie, achieving ~98% accuracy with clear selfies.

TECHNICAL SKILLS

Programming: JavaScript, Python

Web & Frameworks: React.js, Node.js, Express.js, HTML, CSS, REST APIs

Databases: MongoDB, MongoDB Atlas, MongoDB Compass

AI / Computer Vision: OpenCV, InsightFace, ONNX Runtime, FAISS, NumPy

Tools & Platforms: Git, GitHub, Vite, Hostinger, JWT
